PRASHANT KUMAR JHA

Senior Backend Engineer / Tech Lead | Distributed Systems & Cloud Architecture

Java 17 • Spring Boot • Microservices • Apache Kafka • Redis • Kubernetes • AWS/Azure

Bengaluru, India (Open to Relocation) | +91 7749994892 | jprashant2026@gmail.com | linkedin.com/in/prashant-kumar-jha-5b504b185

PROFESSIONAL SUMMARY

Senior Backend Engineer and Technical Lead with 8+ years of experience architecting resilient, distributed backend platforms across retail, cloud CI/CD, and banking. At Lowe's India, mentor 8 engineers and support backend stability across 1,621 stores and peak BFCM volumes of 2.3M transactions using Java 17, Spring Boot, Kafka, Redis, and PostgreSQL. Previously led a 10-engineer team at IBM delivering cloud-native control-plane tooling; optimized API latency from 8 seconds to 170 milliseconds and drove edge-to-cloud scalability.

TECHNICAL SKILLS

Core & Languages: Java (8/17), SQL, Multithreading, Concurrency, JVM Internals & GC Tuning

Frameworks & Architecture: Spring, Spring Boot, Hibernate, RESTful Microservices, Distributed Systems, Event-Driven Architecture

Messaging & Caching: Apache Kafka, Redis (Distributed Caching), MQTT Brokers

Databases & Search: PostgreSQL, Elasticsearch, MongoDB, Oracle 12g, MySQL

Cloud, DevOps & Observability: Kubernetes, Docker, Azure, AWS (S3), Argo CD, Argo Workflows, CI/CD, Prometheus, Grafana, Kibana

AI & Tooling: Generative AI Workflows, Microsoft Copilot, MCP Configuration, Maven, Git, Snyk

PROFESSIONAL EXPERIENCE

Senior Software Engineer – Lowe's India **Jan 2025 – Present**

Project: Estate Management Platform (Tachyon Wiz & Nimbus) | Java 17, Spring Boot, Microservices, Azure, Kafka, Redis, PostgreSQL, Elasticsearch, MQTT, Generative AI

- Mentor 8 engineers, delivering 30+ RESTful APIs and microservices and setting technical direction for service architecture.
- Architected store-edge microservices (Tachyon Wiz) backed by PostgreSQL to support localized, fault-tolerant store operations across 1,621 retail locations.
- Engineered centralized core ingestion services (Tachyon Nimbus) integrating Kafka, Redis caching, and Elasticsearch to process telemetry and events from edge stores via MQTT brokers.
- Optimized high-traffic inventory and lookup APIs, reducing p99 latency from 8 seconds to 170 milliseconds using distributed Redis caching across Elasticsearch-backed workloads.
- Built a secure secret-creation and device-login mechanism adopted as the client's standard authentication interface for store users.
- Drive Snyk-based security remediation across Java, Python, and npm applications, using Snyk Auth and Generative AI to accelerate resolution.
- Designed Grafana, Kibana, and Prometheus dashboards; helped raise automated test coverage from 46% to 80% using JUnit 5/BDD.
- Cut deployment time from 6–7 minutes to 2 minutes with PerfX and SonarQube quality gates, and led code-review standards.

Senior Software Developer (Tech Lead) – IBM India **Jul 2023 – Dec 2024**

Project: Enterprise CI/CD Platform & Centralized Control Plane | Java 17, Spring Boot, Microservices, Kubernetes, Docker, Kafka, Elasticsearch, Argo CD, Argo Workflows

- Led a team of 10 engineers to design and deliver an enterprise-grade cloud-native CI/CD platform using Java 17, Spring Boot, and Kubernetes, reducing reliance on third-party tooling.
- Architected backend orchestration services using Kafka and Argo Workflows to automate software delivery and distributed deployment pipelines.
- Drove adoption of Argo CD and Argo Workflows for deployment automation and workflow orchestration.
- Owned application stability across environments, resolving complex pre-production and production issues.

Senior Software Engineer – HCLTech **Oct 2021 – Jul 2023**

Projects: Mobility Marketplace & DeepSite | Spring Boot, Java 8, Hibernate, Tomcat 9, MySQL, Swagger, JUnit 5, REST, Microservices

- Developed and enhanced RESTful microservices for a digital mobility marketplace spanning APIs, data, hardware, and services.
- Integrated AWS S3 to store and serve application assets.
- Delivered API features within sprint commitments and improved test coverage using JUnit 5 and JaCoCo.
- Resolved System Testing and UAT defects while maintaining coding standards.

Software Engineer / Associate Software Engineer – CGI **Nov 2018 – Oct 2021**

Project: CGI Trade 360 | Java 7, Spring Boot, Hibernate, JBoss 7, Oracle 12g, REST Web Services

- Built and enhanced a transaction-processing platform for international trade workflows and rules processing in banking.
- Delivered enhancements and resolved complex pre-production, production, and QA defects.

Associate Java Developer – STIXIS **Mar 2018 – Aug 2018**

- Built a customer B2B portal from scratch, including custom form classes and core application functionality.

CERTIFICATIONS

- Career Essentials in Generative AI – Microsoft & LinkedIn
- SAFe 5 Certification – Scaled Agile
- HPES Certified Java Developer

EDUCATION

- B.Tech, Computer Science Engineering – College of Engineering Bhubaneswar, BPUT

AWARDS & RECOGNITION

- Raise the Roof Award – Mar 2026 & Jan 2026, Lowe's India
- Team Excellence Award – Feb 2026, Lowe's India
- Key Contributor Award – CGI, 2020 & 2021
